

7.1.5-Green campus initiatives include: The institutional initiatives for greening the campus are as follows

Use of bicycles/Battery-powered vehicles

We have encouraged the students to use modes of transportation that uses alternate sources of energy rather than the conventional fuels. In this regards, the institute has placed a cycle parking stand for the students reaching the institute on Bicycle. Also, a separate parking has been given for e-bikes.

Ban on Single use of plastic

The Institute has a policy of non-usage of single-use plastic. Single-use plastics, often described as disposable plastics, are items designed to be used once and discarded. These include plastic bags, straws, bottles, cutlery, and packaging materials. The convenience they offer comes at a significant environmental cost, as these plastics contribute to pollution, harm ecosystems, and pose a threat to wildlife and human health.

Landscaping

The institute does not have a large campus. However, empty spaces and corners have been landscaped by planting saplings.
