

7.1.6-Quality audits on environment and energy are regularly undertaken by the institution

7.1.6.1-The institutional environment and energy initiatives

1. Green Audit

The institute is dedicated to maintaining a green and eco-friendly campus. The term "Green" embodies our commitment to sustainability and can be acronymically defined as "*Global Readiness in Ensuring Ecological Neutrality*" (GREEN). To uphold this commitment, the institute conducts regular green audits to assess the environmental conditions within and around the campus. These audits focus on key initiatives such as effective waste management, energy conservation, and other eco-friendly practices that contribute to a sustainable campus environment.

2. Energy Audit

The institute actively strives to minimize energy consumption and reduce energy costs to the greatest extent possible. As part of this effort, the institute collaborated with *Green Vio Environmental Sustainable Company*, which conducted a comprehensive energy audit. This audit provided detailed insights into the campus's electrical usage, environmental footprint, and overall green energy consumption. The findings serve as a roadmap for implementing further energy-saving measures and fostering a culture of environmental responsibility.

Go Green Initiative

The Go Green initiative is a transformative step towards cultivating a culture of sustainability and environmental awareness among students and staff. By promoting sustainable practices, conserving energy and resources, and raising awareness about pressing environmental issues, the institute is making significant strides towards creating a greener and more conscious campus community.

Through these holistic endeavors, the institute fosters the development of socially responsible individuals who contribute meaningfully to environmental preservation.
